

COMPANY PROFILE

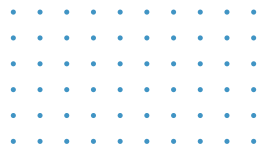

Industrial Design and Integrated Support Services
to Large Companies, SMEs & Start-UP

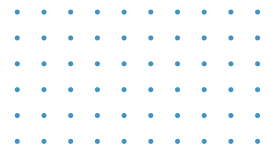

MISSION

For over 30 years we have been supporting companies in the innovation of their business, providing a service in which the engineering part merges with the aesthetic aspect, which must be the distinctive element to stand out on the reference market.

A network of professionals specialized in different sectors allows us to meet the needs of our customers with maximum flexibility and speed.

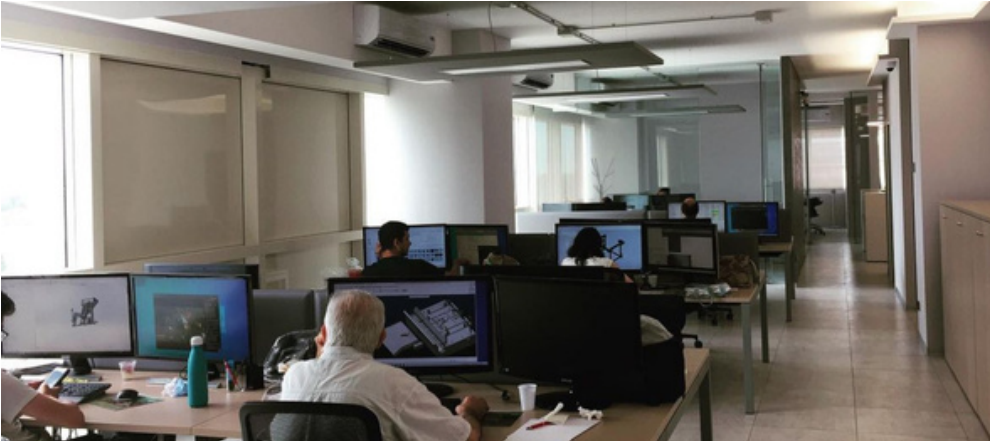

THE COMPANY

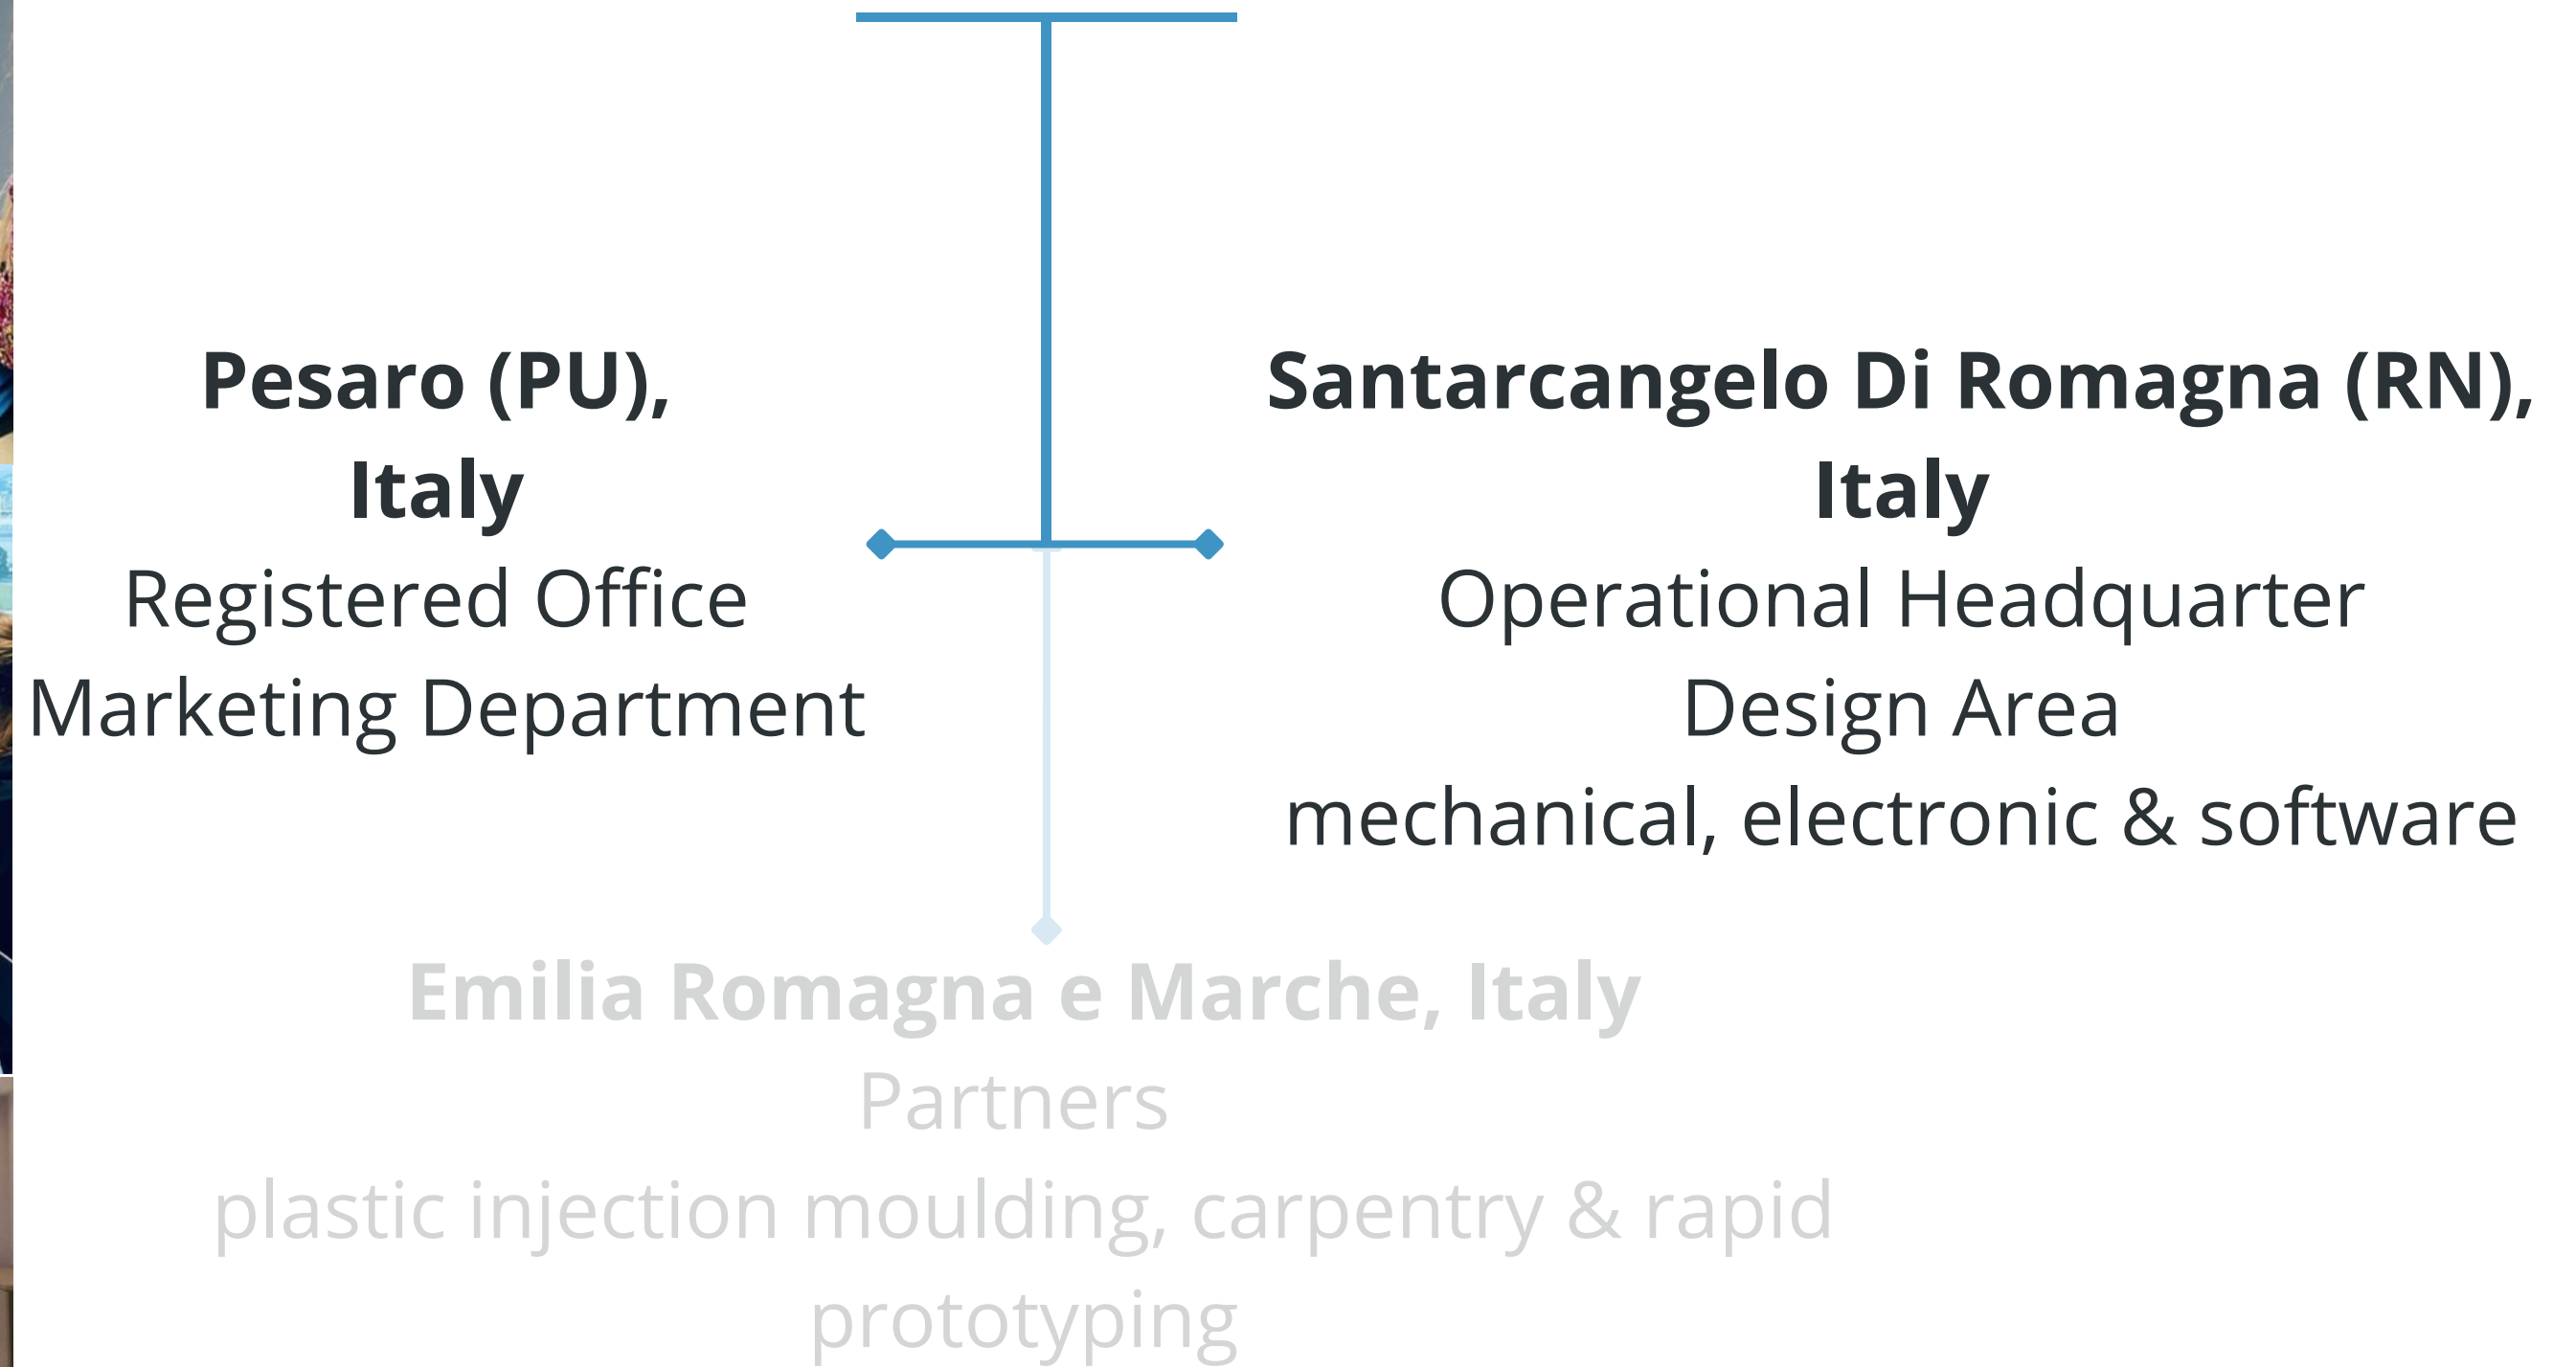

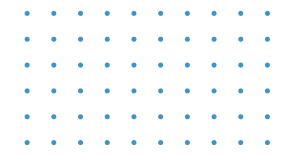

Innovation
through the development of an idea.

AV Consulting is an Italian industrial consulting company that operates in the **world of Design** and **Product innovation**.

It was founded in 2008 by Gabriele Angelucci and Valter Valenti, respectively Head of Marketing and Sales, and Head of R&D.

DESIGN THINKING

Always maintaining a **user-centered perspective**, combines rational and analytical research, providing an effective method to achieve **innovative solutions** in a short time. A discipline that uses the sensitivity and methods of Designers to build products/services by connecting **people's desires** to **technologies factibility** and the best **strategic opportunities** for the client company.

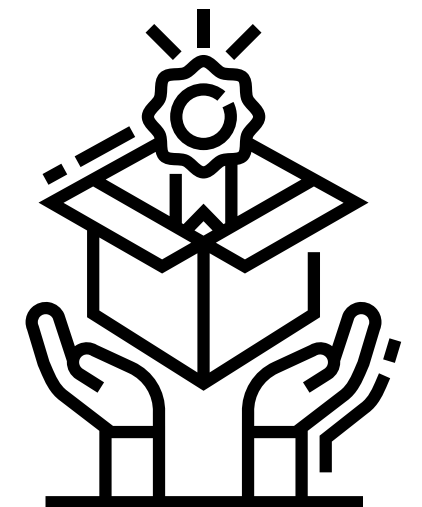

In other words, **Design is innovation.**

TECHNOLOGY

VALUE FOR
THE
COMPANY

SERVICES

Strategic Marketing

- Market analysis and continuous changes
- Exploring new scenarios.
- Comparative analysis and correct positioning for a new profile

Product Design

- The initial concepts are designed with a focus on production costs, feasibility and choice of materials and technologies.
- Our designers always work in teams with our engineers.

Engineering CAD 3D e Cost Saving

The project is finalized for production by designing the various parts in construction detail on 3D CAD.

Design integration, engineering, rapid prototyping, FEM analysis and software CAD 3D simulation allow us to optimize production costs.

SERVICES

Rapid Prototyping

- Stereolithography
- Silicone moulds
- Vacuum casting

Test & Production

- Carbon & composite materials
- Injection moulding
- PUR moulding

Certification

- Research and development for SME's
- Product characterization for the protection of intellectual property
- Quality support within a "WorldWide Certification" system
- Full technical assistance in proposing tenders and access to tools for easy financing

- Modelling
- CNC from slab
- Additive manufacturing

- Sintering
- 3D Printing

- Extrusion
- Thermoforming
- Gravity castings

- Die casting
- CNC machining

SERVICES

Production

- Assembly of equipment in general: electrical and electronic, mechanical and electromechanical
- Testing, design and production Verification

Corporate Branding

Study of the entire corporate identity through the search for signs that identify all written and figurative communication
